

# Performance Features:

**STAINLESS STEEL**

## Queen Marys & Utility Carts

**FWE's utility carts** are designed to last longer than any other - *period!* These rugged mobile utility carts perform year after year, day-in and day-out!

**All welded construction** and our exclusive tubular stainless steel base frame ensure that our cabinets will endure the most rigorous operations and environments.

**Tubular stainless steel push handles** are welded in place.

**Durable stainless steel** takes the abuse of transport applications and allows for sanitary maintenance.

**FWE rugged mobile utility carts** are built tough enough to safely take loads of 200 lbs per shelf.

**Corners are reinforced** with 10-gauge corner plates and extra welds are at critical points.

**Each reinforced 16-gauge stainless steel shelf** has over 9.5 square feet of working space.

**Full perimeter wrap around bumper** protects cabinet and walls during transport.

UCU-512

**Super-duty 8" casters** roll easily and are mounted to reinforcement plates for added durability to take the impact over thresholds and demanding environments.
