

REFERENCE SHEET

PLATE DIAMETER: Measure across full diameter of the plate with a tape measure, pulling to create slight tension on the tape measure. Make note of the exact measurement shown.

The diagram consists of two parts. The left part shows a top-down view of a circular object, possibly a lid, with a central hole. A yellow measuring tape is stretched across its diameter, with red arrows pointing to the ends of the tape. The right part shows a side view of a bowl. A yellow measuring tape is stretched across its widest part, with red arrows pointing to the ends of the tape.

The diagram illustrates the correct method for measuring the height of a container. On the left, a container is shown with red arrows indicating the height measurement. On the right, a measuring tape is used to measure the height from the table surface to the top of the cover, with labels 'TOP OF COVER' and 'TABLE SURFACE'.
