WE keep inmates like John happy by helping you serve hot food hot or cold food cold.

FWE has the toughest, most durable, maintenance-free system in the market to help you serve a good meal! Whether your operation requires food transport carts for satellite feeding programs or bulk food holding cabinets, FWE has the equipment to fit your demanding operation. And if we don't have it standard, we most likely can build it custom!

Feeding your inmates 3 squares a day is just one of your many concerns. Doing

"hard time" in harsh conditions has taught us how to meet your very special needs. We don't just add a "security package" to a catalog item; we build them from the ground up knowing the type of punishment they will be subjected to. With ultra heavy-duty construction and tamper resistant features throughout, they are designed and built for the harshest conditions. During the past six decades FWE has been providing "Correctional Quality" equipment for correctional institutions of all sizes and security levels. With equipment that exceeds all your requirements for reliability and usability, FWE provides the virtually maintenance-free operation that is promised by many but rarely delivered.

You might not be looking for "repeat customers", but FWE has been counted on to serve tens of thousands of inmates like "John" and his friends everyday in every type of environment imaginable.

Our exclusive design features, patented technology, and unsurpassed construction techniques are just a few reasons why FWE has been the choice of those who seek the best built products at an honest value since 1953.

Hey, someone's gotta watch your back!
