FWE's all stainless steel transport is built tough for all purpose transport and storage. Fully insulated for hot or cold transport.

FWE's heavy-duty single door tray cabinet is fully enclosed and designed for fast tray access. Built for mobility, FWE's unibody construction keeps the cabinet balanced and stable during transport. One piece rack and upright assembly make it easy and sturdy to transport 18" x 26" trays.

FWE transport cabinets are fully insulated, including the bottom floor base of the cabinet - not just the door, as in some competitive models.

Our internal frame construction is designed to endure the most rigorous operations and environments, eliminating cabinet torquing during transport, assuring FWE cabinets last longer than any other - *period!*

Durable stainless steel takes the abuse of transport applications and allows for sanitary maintenance. Casters are mounted to reinforcement plates for added durability and take the impact over thresholds. Built tough from stainless steel for continuous demanding use, FWE is the "Choice of Professionals".

CONSTRUCTION. Heliarc welded, single unit construction of stainless steel; 20-gauge polished exterior, 22-gauge stainless steel interior with easy-to-clean covered corners. Welded tubular stainless steel base frame with extra-heavy tubing. 10-gauge stainless steel reinforcing plates at corners and fittings.
INSULATION. "Ultra-Guard" UG-26 high density fiberglass insulation throughout; top, back, bottom, sides, and door(s).
DOORS AND LATCHES. Flush mounted, stainless steel insulated doors. High temperature gasket sealed; gasket shall be cabinet mounted. Each door shall have two (2) heavy-duty edgemount die cast hinges. Door latch shall be edgemounted, full grip, and positive closing. The hinge and latch mountings are reinforced with stainless steel backing plates.

HANDLES. Full-size, form-fitting recessed hand grips shall be mounted on each side of cabinet.
CASTERS. Maintenance free polyurethane tire casters in a configuration of two (2) rigid and two (2) swivel with brake. Casters shall have a reinforced yoke mounted to 10-gauge caster plate. The caster mounting plate shall be secured to a 10-gauge stainless steel reinforcing stress plate via welded in place stainless steel studs. The reinforcing stress plates shall be welded to the heavy gauge tubular frame of the unit.

TRAY RACK ASSEMBLY. Unitized tray rack assembly shall be heavy gauge stainless steel, channels fixed in place at 3" spacings. Assemblies are designed to accommodate one (1) 18" x 26" tray. Removable stainless steel uprights shall easily lift off heavy-duty stainless steel supports without the use of tools.
