

CHECKOUT STATION SPEED LINE

For Point of Sale Systems

STAINLESS STEEL & LAMINATE "CRS" SERIES

Portable and versatile, this checkout station enhances your speed line system with a sleek design to suit your space

- 1** Mobile cashier station supports your POS system and increases efficiency in your cafeteria
- 2** Our speed line equipment is mobile, modular, and flexible. Use these pieces individually or combine with matching speed line system for a complete look. Easily interchange individual units without replacing the entire system
- 3** Fits beautifully into your space with sleek, removable, laminate side panels. Choose from 13 laminate styles and find the perfect fit
- 4** Equipped with 3.5" all swivel locking casters — easily rearrange your speedline layout in minutes, or move aside for cleaning
- 5** Stands up to daily wear with durable stainless steel workspace and tough laminate sides with stainless steel trim. Easy to clean stainless steel top and interior are resistant to corrosion
- 6** Customizable to suit your needs, we offer a variety of custom sizes and options such as locking cash drawer, CPU / printer compartment, pull out keyboard shelf, tray shelf, and more
- 7** Cord management port holes keeps your workspace organized and clear of cords
- 8** Various heights available to fit operation — standard height (34") and elementary height (31.5")

***Two year limited warranty**

Choose from 13 laminate styles to match your design.

CONSTRUCTION. Heliarc welded, single unit construction shall consist of welded stainless steel base frame of heavy gauge 1" square stainless steel tubing with extra 10 gauge stainless steel caster corner plate reinforcements. Work surface shall be constructed of 18 gauge stainless steel. Computer data port hole located on the counter top, and power cord exit port located on the base of the unit.

LAMINATE EXTERIOR. Side and rear laminate panels with stainless steel corner trim shall be .25" thick and easily removable with two screws. A variety of laminate selections are available.

CASTERS. Maintenance free polyurethane tire casters in a configuration of four (4) swivel with brake. Casters shall have a reinforced yoke mounted to 10 gauge caster plate. The caster mounting plate shall be secured to a 10 gauge stainless steel reinforcing stress plate via welded in place stainless steel studs. The reinforcing stress plates shall be welded to the heavy gauge tubular base frame.

STORAGE AREA. On all models, the bottom open storage area shall be stainless steel.
INSTALLATION. Unit should not be installed in an area where adverse environmental conditions are present.
